

# Lysophosphatidylcholines

货号: **AYB26743**

## Lysophosphatidylcholines

### 产品信息

生物活性	Lysophosphatidylcholines are a class of chemical compounds which are derived from phosphatidylcholines. Lysophosphatidylcholine is produced from <b>phospholipids</b> by the action of <b>phospholipase A2 (PLA2)</b> . Lysophosphatidylcholine plays critical role in allergic airway disease manifestation.
CAS	9008-30-4
中文名称	
分子量	
体外研究	
体内研究	
形式	Solid
运输条件	Room temperature in continental US; may vary elsewhere.
保存条件	
溶解性	In Vitro: <b>Methanol : 25 mg/mL</b> (Need ultrasonic) <b>H<sub>2</sub>O : (insoluble)</b> <b>DMSO : (insoluble or slightly soluble)</b>
纯度	≥99.0%
