

Phospholipase D

货号: **AYB26855**

Phospholipase D

产品信息

生物活性	Phospholipase D (PLD) is an enzyme of the phospholipase superfamily, which widely exists in bacteria, yeast, plants , animals and viruses, and is often used in biochemical research. Phospholipase D can catalyze the hydrolysis of phosphodiester bonds in glycerophospholipids to produce phosphatidic acid and soluble choline. Phospholipase D is involved in a variety of disease-related processes, including diabetes, atherogenesis, obesity, tumorigenesis, immune response, and neuroendocrine function.
