## Recombinant Proteinase K

### 产品信息

生物活性	Recombinant Proteinase K is a <b>serine protease</b> that cleaves the carboxy-terminated peptide bonds of aliphatic and aromatic <b>amino acids</b> . Recombinant Proteinase K can be used to digest proteins and remove contamination from nucleic acid preparations.
CAS	
中文名称	重组蛋白酶 K
分子量	
体外研究	Proteinase K digestion1. Cells are resuspended in lysis buffer and finally lysed on ice for 15 minutes.2. The crude lysates are obtained by centrifugation at 4°C for 15 minutes. Proteinase K is added to a 20 µl aliquot to get the final concentrations of 2, 4 and 8 µg/ml. Reactions are carried out at 37°C for 30 minutes. <b>The accuracy of these methods have not been independently confirmed. They are for reference only.</b>
