

Adenosine 5'-monophosphate disodium

货号: **AYB28162**

产品信息

生物活性	Adenosine 5'-monophosphate disodium is an orally active purine nucleotide, and participates in ATP metabolism. Adenosine 5'-monophosphate disodium is also a ligand for adenosine 2B receptor . Adenosine 5'-monophosphate disodium can activate AMPK in skeletal muscle, and ameliorates insulin resistance and impaired glucose metabolism. Adenosine 5'-monophosphate disodium can be used for research of diabetes.
CAS	4578-31-8
中文名称	5'-腺嘌呤核苷酸二钠盐(5'-AMP-NA2)
分子量	391.18
体外研究	
体内研究	
形式	Solid
运输条件	Room temperature in continental US; may vary elsewhere.
保存条件	4°C, protect from light
溶解性	
纯度
