产品信息

生物活性	cis-9,10-Methyleneoctadecanoic acid is a cyclopropane fatty acid that has been found in bacteria and in the digestive glands of <i>P. globosa</i> . It is a component of the cell membrane of <i>Staphylococcus aureus</i> , and levels were reduced after treatment with carvacrol. cis-9,10-Methyleneoctadecanoic acid is secreted by <i>H. pylori</i> and enhances histamine- and dibutyl cAMP-stimulated acid secretion in isolated guinea pig parietal cells. It also activates protein kinase C (PKC) in a calcium-dependent manner.
