研究背景	Transcription factor (PubMed:10698492, PubMed:11909962). Directly controls the expression of cytokine and chemokine genes in a wide variety of different cellular contexts (PubMed:20378371). May control the differentiation, survival and proliferation of lymphoid cells (PubMed:20378371). May also regulate angiogenesis through regulation of expression of genes controlling endothelial cell migration and invasion (PubMed:15247905, PubMed:15592518) Transcription factor (PubMed:15994560). Directly controls the expression of cytokine and chemokine genes in a wide variety of different cellular contexts (By similarity). May control the differentiation, survival and proliferation of lymphoid cells (By similarity).
