研究背景	Component of the ESCRT-I complex, a regulator of vesicular trafficking process Component of the ESCRT-I complex, a regulator of vesicular trafficking process Component of the endosomal sorting complex required for transport-I (ESCRT-I) complex, a regulator of vesicular trafficking process. The ESCRT-I complex participates in the sorting of membrane proteins into vesicles that bud into late endosomal compartments called multivesicular bodies, and is also involved in the budding of many viruses
