靶点信息

研究背景	Lacks the C-terminal ligand-binding domain and therefore constitutively regulates the transcription of a specific set of canonical AR-target genes, including PSA/KLK3 and TMPRSS2, independently of steroid hormones (PubMed:19244107, PubMed:25008967). However, some genes are differentially regulated by full-length AR (isoform 1) and isoform 3. Isoform 3-specific target genes may be regulated independently of FOXA1 expression (PubMed:25008967)
