Growth Hormone (YD31487) Rabbit mAb

货号: **AYD13758**

产品信息

反应	Human
宿主	Rabbit
克隆性	Monoclonal
预测反应	
应用	WB IHC-P IP
推荐浓度	
理论分子量	25kDa
实测分子量	
形式	Liquid
保存条件	Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.75% BSA,50% glycerol,pH7.3.
偶联物	Unconjugated
阳性对照	human placenta tissue
细胞定位	Secreted
纯化	亲和纯化

抗原信息

抗原信息	
------	--

靶点信息

研究背景	The protein encoded by this gene is a member of the somatotropin/prolactin family of hormones which play an important role in growth control. The gene, along with four other related genes, is located at the growth hormone locus on chromosome 17 where they are interspersed in the same transcriptional orientation; an arrangement which is thought to have evolved by a series of gene duplications. The five genes share a remarkably high degree of sequence identity. Alternative splicing generates additional isoforms of each of the five growth hormones, leading to further diversity and potential for specialization. This particular family member is expressed in the pituitary but not in placental tissue as is the case for the other four genes in the growth hormone locus. Mutations in or deletions of the gene lead to growth hormone deficiency and short stature.
基因ID	2688
基因名	GH1
Swiss	P01241 (https://www.uniprot.org/uniprotkb/P01241/entry)
别名	Growth Hormone (YD31487),Growth Hormone (YD31487) Rabbit mAb,GH1,Growth hormone,Growth hormone 1,Pituitary growth hormone
