Phospho-Filamin A (Ser1083) (YD13051) Rabbit mAb

货号: AYD14041

产品信息

反应	Human
宿主	Rabbit
克隆性	Monoclonal
预测反应	
应用	WB
推荐浓度	
理论分子量	281kDa
实测分子量	
形式	Liquid
保存条件	Store at -20℃. Avoid freeze / thaw cycles. Buffer: PBS with 0.75% BSA,50% glycerol,pH7.3.
偶联物	Unconjugated
阳性对照	HeLa,U-251MG,Mouse lung,Mouse spleen
细胞定位	Cytoplasm, cell cortex, cytoskeleton, Perikaryon, Cell projection, growth cone, podosome
纯化	亲和纯化

抗原信息

抗原信息	

靶点信息

研究背景	The protein encoded by this gene is an actin-binding protein that crosslinks actin filaments and links actin filaments to membrane glycoproteins. The encoded protein is involved in remodeling the cytoskeleton to effect changes in cell shape and migration. This protein interacts with integrins, transmembrane receptor complexes, and second messengers. Defects in this gene are a cause of several syndromes, including per iventricular nodular heterotopias (PVNH1, PVNH4), otopalatodigital syndromes (OPD1, OPD2), frontometa physeal dysplasia (FMD), Melnick-Needles syndrome (MNS), and X-linked congenital idiopathic intestinal p seudoobstruction (CIIPX). Two transcript variants encoding different isoforms have been found for this ge ne.
基因ID	2316
基因名	FLNA
Swiss	P21333 (https://www.uniprot.org/uniprotkb/P21333/entry)
别名	Phospho-Filamin A (Ser1083) (YD13051),Phospho-Filamin A (Ser1083) (YD13051) Rabbit mAb,FLNA,Actin-binding protein 280,Alpha-filamin,Endothelial actin-binding protein,Filamin-1,Non-muscle filamin,FLN,FLN 1
