MICA (YD14965) Rabbit mAb

货号: **AYD15182**

产品信息

反应	Human
宿主	Rabbit
克隆性	Monoclonal
预测反应	
应用	WB
推荐浓度	
理论分子量	43kDa
实测分子量	
形式	Liquid
保存条件	Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.75% BSA, 50% glycerol, pH7.3.
偶联物	Unconjugated
阳性对照	MCF7, SW480, NCI-H460, HepG2, HeLa, Mouse kidney, Mouse ovary, Rat kidney
细胞定位	Cell membrane, Cytoplasm
纯化	亲和纯化

抗原信息

抗原信息

靶点信息

研究背景	This gene encodes the highly polymorphic major histocompatibility complex class I chain-related protein A. The protein product is expressed on the cell surface, although unlike canonical class I molecules it does not seem to associate with beta-2-microglobulin. It is a ligand for the NKG2-D type II integral membrane protein receptor. The protein functions as a stress-induced antigen that is broadly recognized by intestinal epithelial gamma delta T cells. Variations in this gene have been associated with susceptibility to psoriasis 1 and psoriatic arthritis, and the shedding of MICA-related antibodies and ligands is involved in the progression from monoclonal gammopathy of undetermined significance to multiple myeloma. Alternative splicing of this gene results in multiple transcript variants.
基因ID	100507436
基因名	MICA
Swiss	Q29983 (https://www.uniprot.org/uniprotkb/Q29983/entry)
别名	MICA (YD14965),MICA (YD14965) Rabbit mAb,MICA,PERB11.1
