|------|---|
| 研究背景 | GTPase-activating protein for RHOA and CDC42. Facilitates mitochondrial quality control by promoting Par kin-mediated recruitment of autophagosomes to damaged mitochondria (PubMed:38081847). Negatively regulates the growth of human parainfluenza virus type 2 by inhibiting hPIV-2-mediated RHOA activation via interaction with two of its viral proteins P and V (PubMed:27512058) |
