靶点信息

研究背景	This gene encodes a member of the U-box ubiquitin ligase family. The encoded protein is involved in mult iubiquitin chain assembly and plays a critical role in chromosome condensation and separation through the polyubiquitination of securin. Autoantibodies against the encoded protein may be markers for scleroderma and Crohn's disease. A pseudogene of this gene is located on the long arm of chromosome 3. Alternat ively spliced transcript variants encoding multiple isoforms have been observed for this gene.
