# TRADD Rabbit mAb

货号: **AYM28863**

## 产品信息

|       |                                                                                                             |
|-------|-------------------------------------------------------------------------------------------------------------|
| 反应    | Human,Mouse,Rat                                                                                             |
| 宿主    | Rabbit                                                                                                      |
| 克隆性   | Monoclonal                                                                                                  |
| 预测反应  |                                                                                                             |
| 应用    | WB IHC ICC IP                                                                                               |
| 推荐浓度  | <b>WB:</b> 1:500 - 1:2000<br><b>IHC:</b> 1:50 - 1:200<br><b>ICC:</b> 1:50 - 1:200<br><b>IP:</b> 1:20 - 1:50 |
| 理论分子量 | 27kDa/34kDa                                                                                                 |
| 实测分子量 | 34kDa                                                                                                       |
| 形式    | Liquid                                                                                                      |
| 保存条件  | Store at -20°C. Avoid freeze / thaw cycles.<br>Buffer: PBS with 0.75% BSA,50% glycerol,pH7.3.               |
| 偶联物   | Unconjugated                                                                                                |
| 阳性对照  | Mouse brain,Mouse spleen,Mouse kidney                                                                       |
| 细胞定位  | Cytoplasm,Nucleus,cytoskeleton                                                                              |
| 纯化    | Affinity purification                                                                                       |

## 抗原信息

|      |                                                           |
|------|-----------------------------------------------------------|
| 抗原信息 | Recombinant fusion protein corresponding to Human TRADD . |
|------|-----------------------------------------------------------|

## 靶点信息

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 研究背景  | The protein encoded by this gene is a death domain containing adaptor molecule that interacts with TNFRSF1A/TNFR1 and mediates programmed cell death signaling and NF-kappaB activation. This protein binds adaptor protein TRAF2, reduces the recruitment of inhibitor-of-apoptosis proteins (IAPs) by TRAF2, and thus suppresses TRAF2 mediated apoptosis. This protein can also interact with receptor TNFRSF6/FAS and adaptor protein FADD/MORT1, and is involved in the Fas-induced cell death pathway. |
| 基因ID  | 8717                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 基因名   | TRADD                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 别名    | TRADD,TRADD Rabbit mAb,TNFRSF1A-associated via death domain                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## 产品验证

Western blot analysis of TRADD expressed in Mouse brain, Mouse spleen, Mouse kidney using TRADD Rabbit mAb at 1:1000. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:5000. Lysates/proteins: 30ug per lane. Blocking buffer: 5% non-fat dry milk in TBST. Detection: ECL Enhanced Kit. Exposure time: 120s.
