## 靶点信息

|       |   |
|-------|---|
| 研究背景  | The gene is part of a 3-member transmembrane receptor kinase receptor family with a processed pseudo gene distal on chromosome 15. The encoded protein is activated by the products of the growth arrest-specific gene 6 and protein S genes and is involved in controlling cell survival and proliferation, spermatogenesis, immunoregulation and phagocytosis. The encoded protein has also been identified as a cell entry factor for Ebola and Marburg viruses. |
