靶点信息

研究背景	This gene is a member of the Ets family of transcription factors and of the ternary complex factor (TCF) s ubfamily. Proteins of the TCF subfamily form a ternary complex by binding to the the serum response fact or and the serum response element in the promoter of the c-fos proto-oncogene. The protein encoded by this gene is a nuclear target for the ras-raf-MAPK signaling cascade. This gene produces multiple isoforms by using alternative translational start codons and by alternative splicing. Related pseudogenes have bee n identified on chromosomes 7 and 14.
