抗原信息

抗原信息	Recombinant fusion protein corresponding to Human Phospho-JunD (S255).

靶点信息

研究背景	The protein encoded by this intronless gene is a member of the JUN family, and a functional component of the AP1 transcription factor complex. This protein has been proposed to protect cells from p53-dependent senescence and apoptosis. Alternative translation initiation site usage results in the production of different isoforms (PMID:12105216).
