抗原信息	Recombinant fusion protein corresponding to Human Phospho-SMAD5 (S463/S465).

靶点信息

研究背景	The protein encoded by this gene is involved in the transforming growth factor beta signaling pathway th at results in an inhibition of the proliferation of hematopoietic progenitor cells. The encoded protein is act ivated by bone morphogenetic proteins type 1 receptor kinase, and may be involved in cancer. Alternativ e splicing results in multiple transcript variants.
