靶点信息

研究背景	This gene encodes a member of the CRMP (collapsing response mediator protein) family thought to be in volved in neural development. Antibodies to the encoded protein were found in some patients with neurol ogic symptoms who had paraneoplastic syndrome. A pseudogene of this gene is found on chromosome 1 1. Multiple alternatively spliced variants, encoding the same protein, have been identified. [provided by R efSeq, Dec 2011]
