抗原信息

抗原信息	Recombinant fusion protein corresponding to Human Syntaxin 3.
------	---

靶点信息

研究背景	The gene is a member of the syntaxin family. The encoded protein is targeted to the apical membrane of epithelial cells where it forms clusters and is important in establishing and maintaining polarity necessary for protein trafficking involving vesicle fusion and exocytosis. Alternative splicing results in multiple transcript variants. [provided by RefSeq, May 2010]
