靶点信息

| | |
|-------|---|
| 研究背景 | This gene encodes a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein functions in endosomal sorting, the phosphoinositide-signaling pathway, and macropinocytosis. This gene may play a role in the tumorigenesis of papillary thyroid carcinoma. Alternative splicing results in multiple transcript variants encoding different isoforms. |
| 基因ID | 27131 |
| 基因名 | SNX5 |
| Swiss | Q9Y5X3 |
| 别名 | SNX5 |
