靶点信息

| | |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 研究背景 | Potential coactivator of the androgen receptor. Mediates STAT3 degradation. May play critical roles in two RAB6-dependent retrograde transport processes: one from endosomes to the Golgi and the other from the Golgi to the ER. This protein binds the HIV-1 TATA element and inhibits transcriptional activation by the TATA-binding protein (TBP). |
| 基因ID | 7110 |
| 基因名 | TMF1 |
| Swiss | P82094 |
| 别名 | TMF, TMF Rabbit mAb, TMF1, Androgen receptor coactivator 160 kDa protein, Androgen receptor-associated protein of 160 kDa, ARA160 |
