抗原信息

抗原信息	A synthetic peptide corresponding to a sequence within amino acids 49-128 of human CGRP (NP_001029125.1).

靶点信息

研究背景	This gene encodes the peptide hormones calcitonin, calcitonin gene-related peptide and katacalcin by tis sue-specific alternative RNA splicing of the gene transcripts and cleavage of inactive precursor proteins. Calcitonin is involved in calcium regulation and acts to regulate phosphorus metabolism. Calcitonin gene-related peptide functions as a vasodilator and as an antimicrobial peptide while katacalcin is a calcium-lo wering peptide. Multiple transcript variants encoding different isoforms have been found for this gene.
