靶点信息

研究背景	Corticotropin-releasing hormone is a potent stimulator of synthesis and secretion of preopiomelanocortin-derived peptides. Although CRH concentrations in the human peripheral circulation are normally low, the y increase throughout pregnancy and fall rapidly after parturition. Maternal plasma CRH probably originat es from the placenta. Human plasma contains a CRH-binding protein which inactivates CRH and which m ay prevent inappropriate pituitary-adrenal stimulation in pregnancy.
