抗原信息	Recombinant protein of mouse CD168/RHAMM
序列	

靶点信息

研究背景	The protein encoded by this gene is involved in cell motility. It is expressed in breast tissue and together with other proteins, it forms a complex with BRCA1 and BRCA2, thus is potentially associated with higher risk of breast cancer. Alternatively spliced transcript variants encoding different isoforms have been noted for this gene.
基因ID	15366
