

# ZCCHC4 Rabbit pAb

货号: **AYP20188**

## 产品信息

|       |                                                                                                        |
|-------|--------------------------------------------------------------------------------------------------------|
| 反应    | Mouse                                                                                                  |
| 宿主    | Rabbit                                                                                                 |
| 克隆性   | Polyclonal                                                                                             |
| 预测反应  |                                                                                                        |
| 应用    | WB                                                                                                     |
| 推荐浓度  | <b>WB:</b> 1:500 - 1:2000                                                                              |
| 理论分子量 | 25kDa/58kDa/59kDa                                                                                      |
| 实测分子量 | 59kDa                                                                                                  |
| 形式    | Liquid                                                                                                 |
| 保存条件  | Store at -20°C. Avoid freeze / thaw cycles.<br>Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3. |
| 偶联物   | Unconjugated                                                                                           |
| 阳性对照  | Mouse kidney                                                                                           |
| 细胞定位  | cytoplasm,nucleolus                                                                                    |
| 纯化    | Affinity purification                                                                                  |

## 抗原信息

|      |                                                                                                                                                                                        |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 抗原信息 | Recombinant fusion protein containing a sequence corresponding to amino acids 50-220 of human ZCCHC4 (NP_079212.2).                                                                    |

## 靶点信息

|      |                                                                                                                                                                          |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 研究背景 | rRNA N6-methyltransferase that specifically methylates the adenine in position 4220 of 28S rRNA. N6-methylation of adenine(4220 in 28S rRNA is required for translation. |
| 基因ID | 29063                                                                                                                                                                    |

|       |                      |
|-------|----------------------|
| 基因名   | ZCCHC4               |
| Swiss | Q9H5U6               |
| 别名    | ZCCHC4;HSPC052;ZGRF4 |

## 产品验证

Western blot analysis of ZCCHC4 expressed in Mouse kidney using ZCCHC4 Rabbit pAb at 1:1000. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:5000. Lysates/proteins: 30ug per lane. Blocking buffer: 5% non-fat dry milk in TBST. Detection: ECL Enhanced Kit. Exposure time: 120s.
