靶点信息

研究背景	This gene encodes a flavin adenine dinucleotide-binding protein that is a key component of the circadian core oscillator complex, which regulates the circadian clock. This gene is upregulated by CLOCK/ARNTL h eterodimers but then represses this upregulation in a feedback loop using PER/CRY heterodimers to inter act with CLOCK/ARNTL. Polymorphisms in this gene have been associated with altered sleep patterns. Th e encoded protein is widely conserved across plants and animals. Two transcript variants encoding differe nt isoforms have been found for this gene. [provided by RefSeq, Feb 2014]
