抗原信息

抗原信息	A synthetic peptide corresponding to a sequence within amino acids 900-1000 of human TMF1 (NP_009045.2).

靶点信息

研究背景	Potential coactivator of the androgen receptor. Mediates STAT3 degradation. May play critical roles in two RAB6-dependent retrograde transport processes: one from endosomes to the Golgi and the other from th e Golgi to the ER. This protein binds the HIV-1 TATA element and inhibits transcriptional activation by the TATA-binding protein (TBP.
