靶点信息

研究背景	This gene belongs to the forkhead family of transcription factors which are characterized by a distinct fork head domain. Studies of the orthologous mouse protein indicate that it functions in kidney development by promoting nephron progenitor differentiation, and it also functions in the development of the retina and optic chiasm. It may also regulate inflammatory reactions and prevent autoimmunity.
基因ID	2297
基因名	FOXD1

Swiss	Q16676
