抗原信息

抗原信息	A synthetic phosphorylated peptide around T93 of human JUN (NP_002219.1).

靶点信息

研究背景	This gene is the putative transforming gene of avian sarcoma virus 17. It encodes a protein which is highly similar to the viral protein, and which interacts directly with specific target DNA sequences to regulate gene expression. This gene is intronless and is mapped to 1p32-p31, a chromosomal region involved in both translocations and deletions in human malignancies.
