靶点信息

研究背景	This gene encodes a member of the family of non-receptor type Tyr protein kinases. This protein is widely expressed in hematopoietic cells and is involved in coupling activated immunoreceptors to downstream s ignaling events that mediate diverse cellular responses, including proliferation, differentiation, and phago cytosis. It is thought to be a modulator of epithelial cell growth and a potential tumour suppressor in hum an breast carcinomas. Alternatively spliced transcript variants encoding different isoforms have been fou nd for this gene.
