

# ABflo® 647-conjugated Goat Anti-Mouse IgG (H+L)

货号: AYS14344

## 产品信息

反应	Mouse
宿主	Goat
克隆性	
预测反应	<b>IF:</b> Mus musculus
应用	FC
推荐浓度	<b>IF/ICC:</b> 1:100 - 1:800 <b>FC:</b> 1:100 - 1:800
理论分子量	
实测分子量	
形式	Liquid
保存条件	Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.025% Sodium Azide, 0.75% BSA, 50% glycerol, pH7.3.
偶联物	ABflo® 647. Ex:650nm. Em:665nm.
阳性对照	
细胞定位	
纯化	Affinity purification

## 抗原信息

抗原信息	Mouse IgG
------	-----------

## 靶点信息

研究背景	Secondary antibodies are affinity-purified antibodies which will work with target-specific primary antibody in the detection, sorting or purification of its specified target. Secondary antibodies offer increased versatility enabling users to use many detection systems (e.g. HRP, AP, fluorescence). They can also provide greater sensitivity through signal amplification as multiple secondary antibodies. Most commonly, secondary antibodies are generated by immunizing the host animal (different from host species of primary antibody) with a pooled population of normal immunoglobulins from the host species of primary antibody and can be further purified and modified (i.e. antibody fragmentation, label conjugation, etc.) to ensure well-characterized specificity to corresponding normal immunoglobulins.
