

## SGOL1 Rabbit pAb

货号: **B10802** 

## 产品信息

| 反应    | Human,Mouse,Rat   |
|-------|---|
| 宿主    | Rabbit  |
| 克隆性   | Polyclonal  |
| 预测反应  |   |
| 应用    | WB IF/ICC   |
| 推荐浓度  | WB: 1:500 - 1:2000<br>IF/ICC: 1:50 - 1:200  |
| 理论分子量 | 24kDa/29kDa/31kDa/33kDa/35kDa/60kDa/64kDa   |
| 实测分子量 | 75kDa   |
| 形式    | Liquid  |
| 保存条件  | Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.01% thiomersal,50% glycerol,pH7.3.                       |
| 偶联物   | Unconjugated  |
| 阳性对照  | A-549,HT-29,Mouse testis,Rat testis   |
| 细胞定位  | Chromosome,Cytoplasm,Nucleus,centromere,centrosome,cytoskeleton,kinetochore,microtubule organizin g center,spindle pole |
| 纯化    | Affinity purification   |

## 抗原信息

| 抗原信息 | Recombinant fusion protein containing a sequence corresponding to amino acids 10-100 of human SGOL 1 (NP_612493.1). |  |
|------|---|--|
| 序列   | SFQDSLEDIKKRMKEKRNKNLAEIGKRRSFIAAPCQIITNTSTLLKNYQDNNKMLVLALENEKSKVKEAQDIILQLRKECYYLT CQLYALK                        |  |

靶点信息

| 研究背景         | The protein encoded by this gene is a member of the shugoshin family of proteins. This protein is thought to protect centromeric cohesin from cleavage during mitotic prophase by preventing phosphorylation of a cohesin subunit. Reduced expression of this gene leads to the premature loss of centromeric cohesion, mi s-segregation of sister chromatids, and mitotic arrest. Evidence suggests that this protein also protects a small subset of cohesin found along the length of the chromosome arms during mitotic prophase. An isof orm lacking exon 6 has been shown to play a role in the cohesion of centrioles (PMID: 16582621 and PMI D:18331714). Mutations in this gene have been associated with Chronic Atrial and Intestinal Dysrhythmia (CAID) syndrome, characterized by the co-occurrence of Sick Sinus Syndrome (SSS) and Chronic Intestinal Pseudo-obstruction (CIPO) within the first four decades of life (PMID:25282101). Fibroblast cells from CAID patients exhibited both increased cell proliferation and higher rates of senescence. Pseudogenes of this g ene have been found on chromosomes 1 and 7. Alternative splicing results in multiple transcript variants. |
