靶点信息

研究背景	This gene belongs to the TIMP gene family. The proteins encoded by this gene family are inhibitors of the matrix metalloproteinases, a group of peptidases involved in degradation of the extracellular matrix (ECM). Expression of this gene is induced in response to mitogenic stimulation and this netrin domain-containi ng protein is localized to the ECM. Mutations in this gene have been associated with the autosomal domin ant disorder Sorsby's fundus dystrophy.
