## 抗原信息

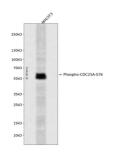

抗原信息	A synthetic phosphorylated peptide around S76 of human CDC25A (NP_001780.2).
序列	MGSSE

#### 靶点信息

研究背景	CDC25A is a member of the CDC25 family of phosphatases. CDC25A is required for progression from G1 t o the S phase of the cell cycle. It activates the cyclin-dependent kinase CDC2 by removing two phosphate groups. CDC25A is specifically degraded in response to DNA damage, which prevents cells with chromoso mal abnormalities from progressing through cell division. CDC25A is an oncogene, although its exact role in oncogenesis has not been demonstrated. Two transcript variants encoding different isoforms have been found for this gene.
