

# L-Citrulline DL-malate

货号: **B26818**

## 产品信息

|      |                                                                                                                                                  |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| 生物活性 | L-Citrulline DL-malate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. |
| CAS  | 70796-17-7                                                                                                                                       |
| 中文名称 | L-瓜氨酸DL-苹果酸盐                                                                                                                                     |
| 分子量  | 309.27                                                                                                                                           |
| 体外研究 |                                                                                                                                                  |
| 体内研究 |                                                                                                                                                  |
| 形式   | Solid                                                                                                                                            |
| 运输条件 | Room temperature in continental US; may vary elsewhere.                                                                                          |
| 保存条件 |                                                                                                                                                  |
| 溶解性  |                                                                                                                                                  |
| 纯度   |                                                                                                                                                  |
