

# N,N,N-Trimethyloctan-1-aminium chloride

货号: **B26923**

## 产品信息

|      |                                                                                                                                                                   |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 生物活性 | N,N,N-Trimethyloctan-1-aminium chloride is a biochemical reagent that can be used as a biological material or organic compound for life science related research. |
| CAS  | 10108-86-8                                                                                                                                                        |
| 中文名称 | 三甲基正辛基氯化铵                                                                                                                                                         |
| 分子量  | 207.79                                                                                                                                                            |
| 体外研究 |                                                                                                                                                                   |
| 体内研究 |                                                                                                                                                                   |
| 形式   | Solid                                                                                                                                                             |
| 运输条件 | Room temperature in continental US; may vary elsewhere.                                                                                                           |
| 保存条件 |                                                                                                                                                                   |
| 溶解性  |                                                                                                                                                                   |
| 纯度   |                                                                                                                                                                   |
