

# Hyaluronate lyase

货号: **B27168**

## Hyaluronate lyase

产品信息

生物活性	Hyaluronate lyase can cleave hyaluronate (HA) and produce unsaturated disaccharides through a $\beta$ -elimination reaction. The resulting disaccharides further trigger the downstream pathway and catalyze the next reaction. Hyaluronate lyase helps <i>Streptococcus dysgalactiae subsp.equisimilis</i> (SDSE) acquire nutrients from the host, causing <b>bacterial</b> pathogenicity.
