

# 2-Amino-2-methyl-1,3-propanediol

货号: **B27173**

产品信息

|      |                                                                                                                                                                                                                 |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 生物活性 | 2-Amino-2-methyl-1,3-propanediol is a solid-solid phase change <b>materials</b> (PCMs). Amino-2-methyl-1,3-p ropanediol can be used to make surfactants, vulcanization accelerators and as a biological buffer. |
| CAS  | 115-69-5                                                                                                                                                                                                        |
| 中文名称 |                                                                                                                                                                                                                 |
