生物活性	omega-3 Arachidonic Acid methyl ester, mainly represented by docosahexaenoic acid, eicosapentaenoic acid and alpha-linoleic acid, are essential dietary nutrients required for normal growth and development. Methyl omega-3 arachidonic acid is a neutral fat-soluble form of the rare fatty acid omega-3 arachidonic acid. Omega-3 fatty acids, as a group, have been associated with reduced inflammation and autoimmune activity, as well as reduced thrombosis and platelet activation.
