

Creatininase

货号: **B27861**

Creatininase

产品信息

生物活性	Creatininase (Creatinine amidohydrolase; CAH), namely creatinine amidohydrolase, from <i>Pseudomonas putida</i> , is a homohexameric enzyme commonly used in biochemical research. Creatininase acts on carbon-nitrogen bonds other than peptide bonds, and can catalyze the hydrolysis of creatinine to creatine, which can then be metabolized by creatinase to urea and sarcosine.
