

Glucose dehydrogenase

货号: B28041

Glucose dehydrogenase

产品信息

生物活性	Glucose dehydrogenase is a oxidoreductase. Glucose dehydrogenase catalyzes the oxidation of β -D-glucose to β -D-glucono-1,5-lactone with simultaneous reduction of the cofactor NADP^+ to NADPH or, to a lesser extent, NAD^+ to NADH. Glucose dehydrogenase accepts both NAD^+ and NADP^+ as cofactors and can be used for the regeneration of NADH and NADPH.
