

Sucrose phosphorylase

货号: **B28206**

Sucrose phosphorylase

产品信息

生物活性	Sucrose phosphorylase is a bacterial transglucosidase that catalyzes the conversion of sucrose and phosphate into α -D-glucose-1-phosphate and D-fructose. The glucosylated Sucrose phosphorylase can also be hydrolyzed into α -D-glucose, or transfer the glucosyl to the hydroxyl group of the receptor, and then decomposed into new α -D-glucoside products. The enzymatic activity of base phosphorylase to substrate and product is weak.
