

# Ethyl decanoate

货号: **B28315**

## 产品信息

|      |                                                                                                                                           |
|------|-------------------------------------------------------------------------------------------------------------------------------------------|
| 生物活性 | Ethyl decanoate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. |
| CAS  | 110-38-3                                                                                                                                  |
| 中文名称 | 正癸酸乙酯                                                                                                                                     |
| 分子量  | 200.32                                                                                                                                    |
| 体外研究 |                                                                                                                                           |
| 体内研究 |                                                                                                                                           |
| 形式   | Liquid                                                                                                                                    |
| 运输条件 | Room temperature in continental US; may vary elsewhere.                                                                                   |
| 保存条件 |                                                                                                                                           |
| 溶解性  |                                                                                                                                           |
| 纯度   |                                                                                                                                           |
